

Wiper Inserts

In cases where only the wiper insert itself, rather than the entire blade, needs to be replaced, the best choice is Genuine Toyota. They're designed and engineered specifically for each Toyota vehicle.

Sometimes, non-genuine manufacturers try to design one wiper insert to fit a variety of vehicle models to consolidate parts inventory. This can compromise fit and performance. For instance, with non-genuine wiper inserts, you may have to measure the old insert and in some cases cut the new one to fit the blade. Genuine Toyota Wiper Inserts, however are pre-cut to the exact length needed, making them easier to install onto existing blades.

FEATURES:	ADVANTAGE: What does it do?	CUSTOMER: BENEFIT
1. Molded Natural Rubber Insert	Toyota-approved rubber compound.	Designed and engineered specifically for Toyota vehicles, precision-molded to fit blade configuration; optimal wipe quality; rubber cannot be dislodged from blade so the possibility of scratching the windshield is eliminated.
2. Engineered for specific vehicle applications (Fit/Size)	Engineered to fit windshield contour of each vehicle.	Precise fit for optimal wipe quality.
